# Highly scalable SaaS solutions lead to margin improvement

30<sup>th</sup> September 2021

H1-21 RESULTS RELEASE

RIC: NSP.MI BBG: NSP IM Neosperience reported growing revenues on the back of the increasing sales of more lucrative SaaS solutions. Thus, EBITDA soared more than proportionately to top line. Furthermore, the group is working on a few M&A opportunities, looking at companies with proprietary cutting-edge software solutions able to enrich the group's offer.

#### Estimates, Rating and PT confirmed

In H1-21, Neosperience unveiled double-digit sales growth and a more than proportional rise in margins. Considering the level of revenues achieved in H1-21, Neosperience will have to post fairly sustainable implicit sales growth to the tune of 12.5% in H2-21 in order to reach our forecast for FY-21. Consequently, we left our estimates unchanged. Moreover, we have updated our DCF model by bringing the free risk rate up to date, which has remained broadly stable since our Initiation of Coverage. Thus, we confirmed our DCF-based PT of € 10.00/s, 54.8% upside. Buy recommendation reiterated.

## Revenues grew by 23.0% YoY to € 8.8m...

Sales were € 8.8m, up by 23.0% YoY as a result of the increasing number of clients coupled with the consolidation of Myti Srl and ADChange Srl as from H2-20. The Covid-19 pandemic definitely changed consumer habits and behaviours, namely increasing the need of remote working, home delivery and digital commerce. As a consequence, businesses had to adapt to the new environment by accelerating the digital transformation of their processes and adopting innovative technological solutions in order to enhance efficiency and productivity.

### ...EBITDA rose more than proportionately to revenues

EBITDA stood at € 3.1m, 30.2% margin, +280 bps YoY thanks to the increasing sales of more lucrative highly scalable SaaS solutions. In particular, sales stemming from solution licensing based on the proprietary platform grew almost 50% YoY. D&As rose to € 1.9m on the back of significant R&D investment aimed at improving the Neosperience Cloud platform as well as developing new Solutions. Furthermore, D&As include goodwill amortisation stemming from the massive acquisition campaign carried out by Neosperience in the last few years. As a consequence, EBIT totalled € 1.2m, 11.6% margin. Group Net Profit was € 0.2m, 2.3% margin, up 24.4% YoY. NFP stood at € 5.9m, vs € 5.4m at the end of 2020, on the back of € 2.1m of operating cash flow, more than counterbalanced by capex of € 2.4m, mainly related to the capitalisation of development costs due to the platform evolutions.

Strengthening of competitive positioning goes on. Further M&As under discussion

In H1-21, the group continued strengthening its competitive positioning in the reference market, especially in Italy, thanks to the state-of-the-art Neosperience Cloud platform. In particular, Neosperience developed some activities in the Healthcare sector in order to promote digital transformation in hospitals and polyclinics through the innovative Neosperience Health Cloud solution. On the other hand, international expansion was temporarily slowed down by the pandemic, mainly with regard to those projects dedicated to Chinese tourists developed together with Tencent. Finally, the group should definitely benefit from the National Recovery and Resilience Plan in the next years, as almost € 50bn will be dedicated to the digital transformation of businesses and public administrations.

### The Company at a Glance

Set up in Brescia by Dario Melpignano and Luigi Linotto in 2006, today Neosperience is a leading software vendor operating in the digital customer experience & customer analytics sector. Thanks to its deep knowledge of software and app developing, the group internally designed Neosperience Cloud, an innovative cutting-hedge Customer Data Platform based on Artificial Intelligence helping businesses to acquire new clients and increase the value of existing ones. Neosperience's 'empathy in technology' vision perfectly explains the peculiarity of the group's offer: by applying machine learning to the results of decades of research in cognitive, social, and behavioural psychology, organisations can provide their clients with a customised and optimised experience based on customer personality.

The company reported a 41.0% sales CAGR<sub>16-20</sub> mainly driven by the increase in sales of solutions based on its proprietary Neoperience Cloud platform as well as by the strategic acquisition of a few small companies operating in the digital customer experience arena. FY-20 figures show revenues of  $\leqslant$  16.4m, value of production of  $\leqslant$  19.6m, EBITDA of  $\leqslant$  4.8m, 24.7% margin and Net Profit of  $\leqslant$  0.3m. Net Financial Position was  $\leqslant$  5.4m, corresponding to 1.1x NFP/EBITDA.

#### **ANALYST CERTIFICATION**

This publication was prepared by **LUCA ARENA**, Head of the Equity Research Department of "Corporate Family Office SIM S.p.A." ("CFO SIM") and **GIANLUCA MOZZALI**, Equity Analyst of CFO SIM. This is to certify that the views expressed on the companies mentioned in this document reflect the analysts' personal opinions and that no direct or indirect recompense has been, or will be, received by the analyst further to the views expressed herein.

#### DISCLAIMER

This document has been drafted by CFO SIM, authorised by the Bank of Italy to provide investment services.

CFO SIM does not have a specific interest in either the issuer, the financial instruments or the transactions covered by the analysis.

The news and data used in this document come from information supplied to the public by the company concerned and/or from other documentation of public domain. CFO SIM is not liable for the accuracy, completeness, exactitude and impartiality of such news and data. This document has been drafted autonomously and independently and without the collaboration of the company analysed or of any company linked to the latter by shareholdings or control. This document has been prepared by the financial analysts of the Equity Research Department of CFO SIM, whose names are indicated therein. The analysts are ordinary members of the Italian Association of Financial Analysts (AIAF). In no case can the company and the analysts, as authors of this document be held liable (culpably or otherwise) for damage stemming from use of the information or opinions set out therein. The purpose of this document is solely informative. The document cannot be reproduced directly or indirectly and redistributed to third parties, nor can it be published, either totally or in part, for any reason whatsoever. This document is not an invitation to purchase, nor is it intended to solicit the purchase or sale of the securities in question. The recipients of this document are formally bound to observe the constraints indicated above.

CFO SIM wishes to provide ongoing coverage of the stocks mentioned in this document, with a frequency depending on circumstances considered to be important (corporate events and changes of recommendation, etc.). CFO SIM acts as a Nomad and Corporate Broker for Neosperience stock, listed on AIM Italia. The next table shows the ratings issued on the stock in the last 12 months.

DATE	TARGET PRICE	RATING
30/09/2021	€10.00	BUY
29/07/2021	€10.00	BUY

This document is distributed via electronic mail and fax as from the date indicated in the document itself and addressed to some 300 Italian and non-Italian professional investors. The document is available in electronic format at CFO SIM's Internet site, to Italian and non-Italian institutional investors, and/or in Borsa Italiana's Internet site.

#### RATING SYSTEM

- a **BUY** rating is assigned if the target price is at least 15% higher than the market price;
  - a SELL rating is assigned if the target price is at least 15% lower than the market price;
- a **NEUTRAL** rating is assigned if the difference between the current price and target price lies within the +/ -15% bands identified using the preceding criteria.

The rating is determined on the basis of the **expected absolute return 12 months forward** and not on the basis of the estimated out/underperformance relative to a market index. Thus, the rating can be directly linked with the estimated percentage difference between current price and target price. The prices of the financial securities mentioned in the report (also used for the calculation of market capitalisation and market multiples) are the reference prices of the stock market trading day preceding the publication date of the report, otherwise stated.
